

## Diversity Classroom Activity

To raise awareness with regards to diversity and the different needs each individual has, class year 6.2 opted to do a craft. This craft consisted of making life size cardboard figures. These figures were decorated and dressed up in clothes so that they would seem as if they are real human beings. The different colours chosen were to symbolise the different cultures and races of people. This activity was divided into 2 sessions and was linked with a Social Studies lesson related to the different cultures and the issue of multi-culturalism in schools.
