

Year 4.3 Chihuahuas chose the Hedgehog SOS activity as to take part in Dinja Wañda project. The lesson started with the teacher asking students what they already knew about this animal. It was interesting how much information children already knew about this animal. Next we went through the power point presentation available. This resource was well-made with excellent pictures and easy text that explains each picture. Moreover, children identified different ways to protect hedgehogs. Finally children enjoyed making the pendant (craft activity).
